PROFESSIONAL SUMMARY

Performance-driven **Full Stack Developer with 7 years of experience** specializing in **React.js, Node.js, PHP and Python**. Expert in **Agentic Application development (3 years)** using **Claude Code and MCP** to build autonomous AI workflows. Proven track record in **legacy migrations** and **cloud-native architectures**, optimizing application speed by 10x. Skilled in building scalable backends with **React.js and Python**, and managing enterprise deployments within **Microsoft Azure** environments.

TECHNICAL SKILLS

Frontend: React.js, Angular, SASS, Figma-to-Code.

Backend & AI: Express.js, Node.js, Python, PHP, Agentic AI Development, MCP, RESTful APIs, WebSockets.

Cloud & DevOps: Microsoft Azure, AWS, Docker, CI/CD Pipelines.

Tools & Methods: Git (Version Control), Webpack, Babel, Redis, A/B Testing, Agile/Scrum, PWA, Technical Documentation.

Architecture: RESTful API Design, Web Application Architecture, Cloud-Native Development, Problem-Solving & Analytical Thinking.

PROJECTS

- **Autism Recommendation Tool** (React, Django, CI/CD, A/B Testing)
 - Orchestrated the migration of a legacy WordPress site to a **React architecture** using **Claude Code** to refactor components, improving modularity and developer velocity.
 - Achieved a **10x increase in page load speed** by optimizing **Webpack/Babel** configurations and implementing **Redis** caching for high-performance data delivery.
 - Integrated **A/B testing frameworks** to support customer growth objectives, leading to a measurable increase in conversion rates.
 - Collaborated with design teams via **Figma** to ensure cross-client compatibility and pixel-perfect implementation of responsive layouts.
- **Live Transcription** (React, Node.js, WebSockets, PHP)
 - Developed a **real-time live transcription** module using **React and WebSockets**, leveraging AI models for instant speech-to-text conversion.
 - Built a low-latency **Node.js** backend for seamless communication, ensuring high performance during concurrent user sessions.
 - Improved platform accessibility by integrating closed captions and real-time screen-sharing capabilities via **browser APIs**.
 - Contributed to a **30% revenue increase** by attracting new enterprise clients through high-quality feature delivery.
- **Patient Promoter** (JavaScript ES6, PHP & MySQL)
 - Designed a robust **RESTful API** using **PHP** to facilitate seamless communication between the backend and React frontend, ensuring efficient data handling and retrieval.
 - Implemented **authentication and authorization mechanisms** in PHP, securing user access and ensuring data privacy within the application. Developed a complex **SQL schema** and managed the **MySQL database**, handling millions of records efficiently and ensuring data integrity.
 - Implemented **complex server-side routing** and controller logic using **PHP** to efficiently handle and direct user requests across different application modules.

WORK EXPERIENCE

Health Info Platform (Thrive Guide)

Software Engineer (Full-Time)

Mar 2025 – Present

Toronto, Canada

- Architecting the "Thrive Guide" platform using **React.js and Python**, utilizing **AI-assisted coding** to accelerate feature deployment by 40%.
- Leading **Agentic Application development** by implementing **Model Context Protocol (MCP)** to integrate local documentation and data sources into autonomous AI workflows.
- Translating complex **Figma** designs into high-fidelity **Tailwind CSS** components, ensuring 100% accessibility.
- Managing cloud-based deployment pipelines and ensuring seamless integration with **RESTful APIs**.

Loom Analytics

Software Engineer (Full-Time)

Apr 2022 – 2025

Toronto, Canada

- Developed a dynamic data visualization dashboard using **React.js , PHP, Django and Express.js**, reducing analysis time by 25%.
- Utilized **Azure services (CI/CD pipelines)** and optimized **Webpack** configurations to reduce initial load times by 20%.
- Collaborated in an **Agile team** to build **Progressive Web Apps (PWAs)** and browser extensions.
- Participated in rigorous **PR cycles** and **Git-based workflows**, maintaining high code standards.

Classic Informatics

Software Engineer (Full-Time)

Sep 2019 – Aug 2021

- Built full-stack solutions using **React and Node.js/Express**, reducing development cycle time by 20%.
- Designed technology solutions that exceeded performance expectations, improving system efficiency by 25%.
- Applied **Agile methodologies** and **Git version control** to manage project timelines in a fast-paced environment.

EDUCATION

Advanced Diploma in Software Engineering

Centennial College, Toronto

2021 – 2023

Bachelor of Technology in Computer Science

Punjab Technical University, India

2014 – 2018
